

Primary Elementary Newsletter (Sept. 2016)

What we've been up to...

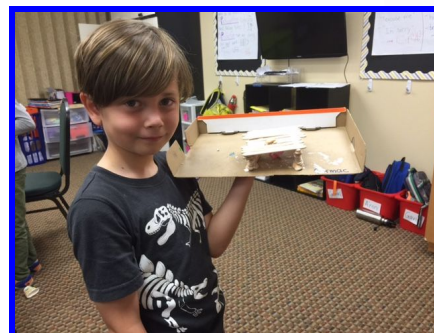

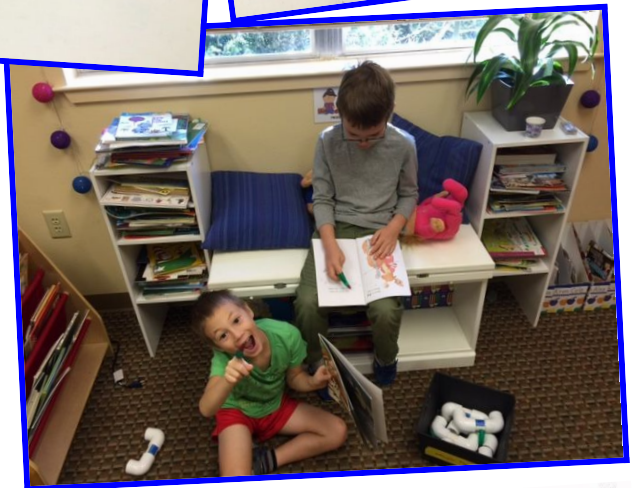

✓ increasing our reading time (Reading A-Z/Raz Kids App-Kori's account, password "Atoms", reading with witch fingers, and reading at snack time)

✓ class discussions/journaling about world problems including global warming, climate change, endangered species, pollution, and recycling

✓ creating our own addition and subtraction math problems and using ordinal numbers (1st, 2nd, etc.) when describing position/location

✓ experimenting with the scientific method and using the engineering design process to build a sturdy house for our pigs (in the event a BIG BAD wolf comes along to blow the house down)

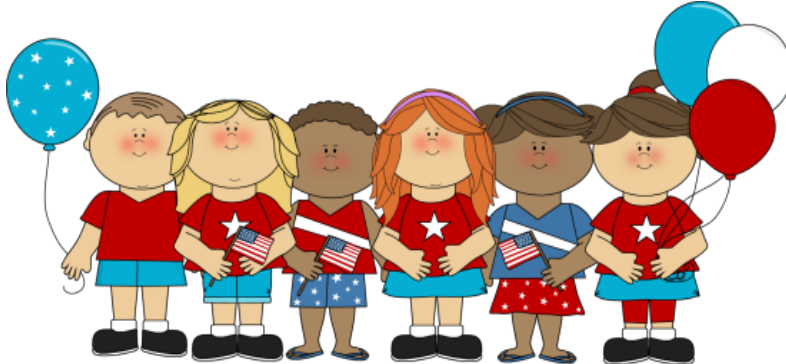

What's coming up...

→ **What is government (democracy, republic, monarchy, dictatorship, etc.), and how does our country's election process work?**

→ **class elections**

→ **We welcome library books, books from home, guest speakers, or other resources to share with the class concerning the above topics. I promise to take good care of borrowed items :).**

→ **Our First Field Study- Wednesday, October, 19th (Austin State Capitol Tour)**

→ **Let's get into character (American inventor, historian, artist, athlete, entrepreneur, etc.) on Monday, October 31st. Maybe we should avoid Clinton and Trump impersonators, haha :).**
